

About me

I'm an 18-year-old AI Product Designer with 6 years of experience in building GenUI-ready design systems and scalable AIUX for products used by 100M+ users. Currently designing the core experience of GigaChat, Eastern Europe's largest AI Assistant, and studying Product Design at HSE University — Russia's top design school, where I was also invited to lecture at 18. Winner of the National Product Design Award, combining system thinking, AI design expertise, and real-world product impact.

Experience

Member of AI Design Staff at Giga AI Assistant (Sberbank), Mar 2025 – Present

Giga is Eastern Europe's largest AI assistant. It's part of Sber ecosystem — a superapp platform spanning finance, media, lifestyle, and beyond with 100M+ monthly active users

My role & contribution

- One of three core designers on the Giga platform team. My focus is on **product and design vision, creating accessible AIUX** for children, teenagers, adults, and seniors, and building a unified design system for the entire ecosystem.
- **Designed key screens and core features:** home screen, chat, photo upload, widgets, user spaces, and document sharing.
- Built a **GenUI-ready design system**, enabling a design process that works **without traditional product designers** — where user scenarios are generated automatically from CJM-based prompts.
- **The design system supports 30+ ecosystem apps**, each fully customizable to their individual brand identity and SDK integration.
- **Defined AIUX guidelines for human–AI interaction principles**, including proactive behavior, reasoning flow, and multimodal interfaces (text, UI, voice, and content).
- Validated and approved CJMs and mockups during DoR and PSI reviews for product teams developing new AI agents.
- **Developed the “no-Figma” (design-in-code) approach**, enabling direct implementation and iteration in code rather than design tools.

Impact

- Achieved **MAU and DAU growth targets** after MVP launch (NN M+ users).
- Reached **engagement goal** (N dialogs per user on average).
- **Reached NN/100 CSI** from internal product teams building AI agents on the platform.
- Built a scalable design system that enables **reducing the need for up to 500 product designers, saving \$15–20M annually** in design production costs.

CEO & Design Director at Demos Education, Apr 2024 – Jul 2025

Founded and led a private study center in Azerbaijan preparing students (grades 9–11) for entrance exams. Oversaw all aspects of building and running the business, from fundraising to product design.

My role & contribution

- Built the business model, recruited and **managed a team of 20+** teachers, designers, SMM, and a developer.
- Designed learning experience, ensuring high exam success rates.
- Led strategy, marketing, hiring, budgeting, and scaling initiatives.

Impact

- Generated **~\$60,000 in revenue** within the first year.
- Raised **~\$23,500 (40,000 AZN)** in seed funding to launch and scale operations.
- Enrolled **30+ students** in the first academic year and achieved profitability.

Senior AI Product Designer at Dzeny, Sep 2024– Oct 2024

Dzeny is an AI psychologist from the UAE who made it into the top 50 of the App Store after launch.

My role & contribution

- Contributed to the early brand identity and visual language of Dzeny.
- Shaped the product's positioning between AI technology and psychological trust, helping to define how the app communicates with users on both emotional and functional levels.

Impact

- Top **50 of the App Store** after launch
- Rating **5.0** on the App Store

Lead Product Designer at Fresh Auto, Jul 2024 – Mar 2025

Fresh Auto is a top-3 car sales company in Russia.

My role & contribution

- Design and product vision for the mobile application.
- Responsible for designing user flows and new screens, and leading the discovery process to identify key growth opportunities for the product.

Impact

- Delivered “Auto Goods” e-commerce MVP, redesigned homepage with personalized promos, and built the “Services” ecosystem, plus Car Reviews, Referral Program, and chat onboarding—improving engagement, conversion, and adoption.
- Set up design research process integrating metrics and user insights into roadmap decisions.
- Regularly presented to C-level and PM leadership, influencing strategic direction.

Senior Product Designer MAX Agency, Jun 2021 – Jul 2023

Co-Founder & Art-Director Vostok1 Agency, Jun 2023 – Jun 2024

Vostok1 is a design studio in Azerbaijan that I co-founded with a friend.

My role & contribution

- Handled client communication, managed design quality across projects, developed project concepts, and led the project team.

Impact

- Website, advertising, branding and communication design for a private school that increased the branch's occupancy rate **from 60% to 100%**.
- Redesigning corporate website, that increased the conversion rate by **38%** in writing an email to the sales manager.
- Redesigning the e-comm site and creating design system from 0 to 1.
- Branding and advertising for a car dealership from scratch. The company made **\$50,000 in net profit** in the first month.

Founding Product Designer Fintech стартап, Mar 2023 – Oct 2023

Swaphunters is a fintech startup enabling fiat-to-crypto exchange with home delivery in the UAE, Turkey, and Thailand.

My role & contribution

- Responsible for the design and product vision of the website and mobile app, and art direction of marketing campaigns.

Impact

- Creating MVP platform for fiat and cryptocurrency exchange in less than a week.
- More than **\$30 000** was exchanged through the platform.

Senior UX/UI Designer Deykun Agency, Mar 2021 – Jun 2023

Communication Designer Firsanov Team, Nov 2020 – Mar 2021

Freelance Designer Mar 2019 – Nov 2020
